

# CSE22: Introduction to Programming

## Lab 2

### 1 Introduction

In this lab you will continue developing your web apps from Lab 1, by adding some interactive components.

### 2 Online Resources

The W3 Schools page on jQuery will be helpful here. Also the Class Demo from September 21.

### 3 Tasks

Your task in this lab is to add a comments section or a star rating mechanism to one of your pages. For example, if you have a page about the poetry that you're writing. Create an interface where a user can leave comments under your poems (or give each poem a star rating). The user should be able to type their name into a textbox, and their comment into another textbox. Then there should be a button, which the user clicks and then their name, along with their comment, should appear in the appropriate part of the page.

### 4 Deadline

This lab assignment is out of 100 points. The due date is Monday September 28, 202 at 11:59 pm.
